PARTNERSHIP

NEW 2026 HE FEES MONITORS – SCHOLARSHIPS, TRANSNATIONAL – MENA!

Eleven years ago, The 5Rs Partnership (www.5rspartnership.com) developed a pilot for the first Fees Monitor, which catalogued all full-time coursework programs offered by Australian and New Zealand universities and their tuition fees for that academic year. The Monitor had immediate appeal and was highly valued by the sector. The extensive suite of annual Higher Education Fees Monitors we now have on offer allows university subscribers to be more strategic and cost-effectively benchmark their fees against competitors and peers.

In the landscape higher education institutions globally now confront, setting student tuition fees has become crucial to domestic and international student recruitment, course portfolio design, and perceptions of university brand, and the positioning of courses.

BENEFITS OF THE UNIVERSITY FEES MONITOR

Each program is classified by institution, state, mission group affiliation (where applicable), award (Masters, Bachelors, Diploma etc.), to allow subscribers to search on multiple levels including using specific program key words, at subject level, by provider groups or specific competitor institutions.

- Provides a comprehensive and comparative database at a cost-effective price.
- Can be purchased centrally and used across academic faculties and departments.
- Allows for more sophisticated analysis of fee setting and helps universities to clearly assess how their fees compare at several levels.
- Allows higher education providers to contrast your portfolio of programs against others and identify areas of new program opportunity.
- Is delivered in an easy to use, Excel based format for filtering and pivoting data.

FEATURES OF THE UNIVERSITY FEES MONITOR

The 5Rs Partnership's Higher Education Fees Monitor products allows universities to:

- Benchmark your domestic and international fees against other universities across key markets.
- Measure your fees with others in your mission group, city or state.
- Analyse patterns between domestic and international fees.
- Compare your portfolio of programs against others and identify areas of program opportunity and positioning.

Each year, the Fees Monitor has been augmented to progressively include a wider range of courses and institutions based on feedback from subscribers.

The Fees Monitor has also been refined to now include scripted data extraction, a rigorous seven stage data checking process, and benchmarking against other available datasets.

NEW, EXPANDED 2026 FEES MONITORS!

1. University Scholarships Monitor

A comprehensive data base of UG, PG and HDR scholarships and bursaries (domestic, international, countries targeted) offered by all Australian universities for 2025/26. This will be a vital addition for universities to position financial support strategically, effectively align to their Mission, and provide a competitive understanding of the scholarship market to take advantage of gaps and opportunities to maximise scholarship strategy.

2. Transnational Higher Education Fees Monitors – MENA (Middle East/North Africa)

Given the rapid growth of the higher education sector universities in transnational education and offshore campuses, we are now expanding to two Transnational Fees Monitor products spanning both 1. Asia and 2. The MENA region. This now includes all branch campuses and partnerships of universities from the key nations competing on the global stage including Australia, the UK, USA, and Canada. Competing programs delivered in English by local institutions are also included.

DELIVERY FOR 2026 FEES MONITORS

The 2026 Higher Education Fees Monitor product suite will be available in January 2026 (Canadian Fees Monitor in September 2025, Scholarships Monitor in August 2025).

NOTE: Early Bird 2026 renewal for current subscribers (by Monday 16 June 2025), a one off 30% discount!

To order your renewal subscription and for any questions, please contact Dr Stephen Holmes PhD at The 5Rs Partnership: s.holmes@5rspartnership.com
